

06 Plastic model Kits

Evolving GUNPLA series poised for promotion worldwide

The GUNPLA series has continued since 1980. As “evolving plastic models,” the GUNPLA series is produced at the BANDAI HOBBY CENTER in Shizuoka, which undertakes every step from planning and development through to production. As product development has continued, today we increasingly see parents and children enjoying GUNPLA side-by-side. The series has enjoyed growing worldwide popularity, and we will focus on attracting even more fans in the global marketplace, with a focus on Asia.

Unicorn Gundam

The GUNPLA series has continued to evolve through tireless effort to advance technology and bring new ideas to market. Leveraging this product, we are vigorously adopting new and original content, expanding our target customer base, and reinforcing overseas business development.

Expanding the circle of new customers with new ideas for hobbies

We are expanding a variety of characters for children, including the original racing hobby GEKI DRIVE, YO-KAI WATCH Plastic Model series, and POKÉMON Plastic Model series. We are also developing the MACROSS Plastic Model series in addition to the STAR WARS Plastic Model series and the B-TRAIN SHORTY series targeting adults.
